

All are welcome to attend!

April 5th @ 12-1pm
Can Learning Be Fun?
Melanie Grubisha, PhD

Learn how to design interactive lectures that encourage audience participation and increase information retention among class attendees. Participants will 1) discover the benefits of interactive lecture formats and 2) become familiar with a few platforms for designing interactive lectures.

**“How-To”
Talks**
By Postdocs
Spring 2018

**Falk Library
Classroom 2**

April 10th @ 1-2pm
**The Application of Mass Spectrometry
in Biomedical Research**
Pengcheng Wang, PhD

Learn about the different kinds of mass spectrometry and their applications in biomedical research, such as drug discovery and development, disease diagnosis, therapeutic outcome monitoring, and precision medicine.

April 19th @ 1-2pm
**Gemstones from the Mud:
technical overview of protein purification**
Erdong Cheng, PhD

Learn different methods of protein purification from bacteria, mammalian cells, and insect cells, as well as technical tips.

April 26th @ 1-2pm
How to Create a Quality Scientific Poster
Itziar Pinilla Macua, PhD

Learn tips and tricks for designing a quality poster to ensure successful presentation of your data. Different formats and ideas will be discussed and we will walk through the preparation of a mock poster.
