

# HSLs *Update*

UNIVERSITY OF PITTSBURGH

*Health Sciences Library System*

January - March 1998

## *New Databases, Expanded Coverage and Linking Options*

The new year brings new databases and expanded coverage to *HSL Online*. We have increased the number of full text journals to 85, added the BioethicsLine database, and added the ability to search all MEDLINE or all HealthSTAR files at one time.

The addition of another 70 journals to the full text collections allows searchers to view, print and save articles from 85 journals with coverage from 1995 to present in most cases and from 1993 to present for the 15 core journals. Full text files, including the Nursing and Mental Health collections, can be searched individually or can be linked from a MEDLINE, CINAHL or PsycINFO search.

The BioethicsLine database includes materials on bioethics selected from the literature of medicine, nursing, biology, philosophy, religion, law and the behavioral sciences. Selections from popular literature are also included. Developed jointly by the Kennedy Institute of Ethics and the National Library of Medicine, documents include journal and newspaper articles, monographs, court decisions, bills, laws and audiovisual materials.

Searchers now have the option of searching all MEDLINE or all HealthSTAR files at one time. MEDLINE can now be searched from 1966 to the present, and HealthSTAR from 1975 to the present. The option of searching by segmented years is still available, with the most recent years' file (i.e. MEDLINE 1993-present) remaining as the default selection.

*See page 3 for a list of full text journals available.*

### ***Alumna Donation Expands Full Text Collection***

Dr. Gloria S. Hope (MA NUR) class of 1963 sponsored the acquisition of Ovid Full Text: The Nursing Collection. This collection was recently added to HSL Online (see cover story).

The Nursing Collection contains the full text of 14 leading journals in both general and specialized nursing fields, with hypertext links to the MEDLINE and CINAHL (Cumulative Index of Nursing and Allied Health) bibliographic databases and the other Ovid Full Text Collections. See page 3 for a list of Nursing Collection titles.

### ***CME Credit Available***

Several classes taught through the Health Sciences Library System have been approved for 1.5 CME credits. For information concerning class schedules and earning credit, contact the Falk Library Reference Desk at 648-8796.

### ***Online Printing Charges***

The Health Sciences Library System has experienced a rapid increase in the cost of providing free online laser printing. These uncontrolled and increasing costs have made it necessary for HSLs to recover printing costs. Effective January 12, 1998, the HSLs instituted a networked printing system which operates on the same vendacard system as the photocopy machines and maintains the same per page costs.

Laser printing charges are implemented in the following HSLs Libraries: Falk Library of the Health Sciences; Western Psychiatric Institute and Clinic Library; School of Nursing Library and Learning Resource Center; and Bergman Library at Montefiore University Hospital.

Patrons still have the option of downloading their print job to a diskette and printing it at a location of their choice. There is no charge for printing from dedicated PITTCAT terminals.

For further information concerning online printing charges, contact the Falk Library Reference Desk at 648-8796, or email to [medlibq+@pitt.edu](mailto:medlibq+@pitt.edu).

## ***Reference Services at WPIC***

Rebecca Abromitis, MLS, joined the Library staff as a Reference Librarian at the Western Psychiatric Institute and Clinic Library in early December. Ms. Abromitis has extensive library experience having previously worked as the University of Pittsburgh Archivist, as a member of the library staff in the School of Engineering and the Carnegie Museum of Natural History, and as a research associate in the Bowling Green State University Archives in Ohio. She also completed a library internship at the Eye and Ear Institute while working towards her degree in Health Sciences Librarianship.

Ester Saghafi, MLS, MED, continues as part-time WPIC Reference Librarian, and is available on Mondays, Tuesdays and Thursdays. Reference Desk coverage at WPIC Library is also provided by Reference Librarian Jill Foust, MLS, and Brian Lauer, Library Specialist.

The newly renovated Reference Office in the WPIC Library is located next to the PC Lab, and is staffed between 8:30 AM and 5:00 PM Monday through Friday. Reference staff are available by phone (624-1919) and through email at <wpicref+@pitt.edu> to help you with your reference questions and literature searches.

## ***Nucleic Acids Research available on the WWW***

NAR Online, the online version of Nucleic Acids Research, is now available on the World Wide Web. Table of Contents, abstracts and full text are available for all issues from 1995 to the present. Articles can be viewed and downloaded in one of three formats: HTML, PDF, or PostScript. Images, graphs and charts are included in the full text, and references are linked to their MEDLINE records. A Table of Contents email service is also available.

***NAR Online:*** <http://www.oup.co.uk/nar>

## ***Notice regarding HSL Online account renewals***

*If you did not renew your account in the Fall and are unable to access HSL Online, you will need to fill out a New Account form through the Health Sciences Library System. Please call 648-8796 to request a form or with any questions.*

## ***Printing Alternatives***

### ***Option 1***

Carry a diskette with you when you come to an HSL Library. Any file you create on any library computer can be copied to a diskette and printed from your home/office computer or at any CIS Lab. (Students receive 1,400 free print pages per semester from CIS.) Diskettes may be purchased from Falk Library's Microcomputer & Media Center (MMC).

### ***Option 2***

Use ftp (file transfer protocol) to send the file to your UNIX/VMS account. FTP will work on any computer in Falk Library's MMC and WPIC's PC Lab. (FTP will not work from HSL Online terminals in the libraries.) Print the file at another location or use a PostScript printer from the VMS and UNIX Timesharing Services.

### ***Option 3***

Use the email option on HSL Online. When doing a search in HSL Online OVID Databases, such as MEDLINE, you can email the citations to your email account. This feature is available from the save option.

If you need assistance in using the printing system or have questions on printing, please ask at the Falk Library or WPIC Library Reference Desk or at the Falk Library MMC. You may also call the Falk Library Reference Desk at 648-8796, the WPIC Reference Desk at 624-1919 or send email to [medlibq+@pitt.edu](mailto:medlibq+@pitt.edu).
